Welcome to Digital Core – IIS Bench!

Hi, and welcome to Digital Core - IIS Bench!

Your time on Bench is an opportunity to strengthen your skills, complete required learning activities, remain deployment-ready, and prepare for your next project assignment.

What to Expect

Use your Bench time productively. You may be assigned training, certifications, capability activities, automation initiatives, project interviews, or other tasks aligned with business needs.

Work Arrangement and Attendance

- **RTO schedule:** Report onsite from **Monday to Thursday** at your designated office location.
    - **Manila:** 16th Floor, Robinsons Cybergate Tower 2
    - **Cebu:** 10th Floor, Cyberzone 2, Cebu IT Park

    Do not work from a near-home location or another office site without a valid business justification, an approved townhall, capability event or medical reason.

- **Friday:** Work from Home. **No resource is allowed to report onsite on Fridays without explicit permission from the CapDev Lead.**
- **Philippine holidays:** Digital Core - IIS Bench follows officially declared Philippine holidays. No work is required on these days, and **Elective Holiday** should be used for MyTE charging. If Elective Holiday credits have already been used up and are no longer available, kindly charge to Vacation Leave.
- **Bench schedule:** Log in between **7:00 AM and 9:00 AM** and complete a 10-hour shift, including breaks.
- **Tardiness:** Logins beginning at 9:01 AM are considered late. Within the same calendar month, one attendance infraction will be recorded when either a single or accumulated tardiness reaches **45 minutes**, or when **five instances** of tardiness occur, whichever comes first.
- **Undertime:** Logging out or leaving the designated work location before completing the required 10-hour shift, without prior approval from your Bench POC or CapDev Lead, is considered undertime and attendance non-compliance.

Daily Login, Reporting, and Availability

- **Monday to Thursday (RTO):** Complete the FY27 IIS Time-In Attendance Form and check in through the Office Pulse Tool.
- **Friday (WFH):** Complete the FY27 IIS Time-In Attendance Form and update the ATCP Bench WFH_Leave Tracker.
- **Sick, Vacation, or Emergency Leave:** Complete the FY27 IIS Time-In Attendance Form and update the ATCP Bench WFH_Leave Tracker.

Leave Process:

- **Vacation Leave and Emergency Leave:** Notify your Bench POC at least one hour before your shift begins or before 9:00 AM and complete all required forms.
- **Sick Leave:** Notify your Bench POC at least one hour before your shift begins or before 9:00 AM and complete all required forms.
- **FWAC requirement:** In accordance with the Sick Leave Guidelines in Total Rewards (PESH), a Fit-to-Work Assessment Certificate (FWAC) is required after **two consecutive** days of absence, upon reaching the equivalent of five sick leave days within the fiscal year, or on the sixth sick leave instance.
- **Return-to-work clearance:** Present the completed FWAC to the designated RTO site clinic nurse and secure clearance before returning to work.

- **Daily Time-Out EOD Report:** Submit the Time-Out EOD Report Form every workday, whether onsite or working from home. The report must reflect completion of the required 10-hour shift, including breaks.
- **Teams' status:** While at your desk, keep your Microsoft Teams status set to **Available** or **Busy**, as applicable. During breaks or lunch, it may automatically change to **Away**, or you may update it manually. When on leave, set your status to **Out of Office** and indicate the applicable leave type.

MyTE Guidelines

- **Submission deadline:** Complete and send your time report for approval on or before the internal deadline stated in the official MyTE reminder for each cut-off. Late or missing time reports may be treated as non-compliance; two consecutive unprocessed cut-offs may result in pay being placed on hold.
- **Bench WBS:** Use only the Bench WBS assigned to you in the official MyTE reminder and only for the dates when you are tagged to Bench. If you are deployed during the cut-off, use the appropriate project WBS for the applicable project dates.
- **Time and leave entries:** Record all working hours and leave entries accurately and ensure they are consistent with the attendance and leave trackers. **Knowingly providing false information or submitting inaccurate time entries may be subject**

to investigation as potential fraud and handled in accordance with the Time & Expense Reporting policy.

- **Shift and work location:** Select the prescribed Bench shift and record the correct work location for each date—your designated office location for RTO days and Work from Home for approved WFH days.
- **Reviewers, approvers, and authorizations:** MyTE approvals and authorizations are handled by the **ATCP Bench Management Team (BMT)**, not Capability Development (CapDev). Add the reviewers, approvers, and delegates listed in the latest MyTE reminder. Select **Approver submits my Time Report** when instructed, review all entries, and use **Send for Approval**.
- **Restricted charges:** Do not charge overtime, shift premium, on-call time, weekend work, holiday work to the Bench WBS unless specifically authorized under the applicable guidance.
- **BusOps Ticket Tool:** Submit a ticket through the BusOps Ticketing Tool for applicable MyTE concerns, including access, WBS, time-report, or approval issues. Include complete and accurate details and monitor the ticket until the concern is resolved.
- **Corrections and access issues:** Act promptly on any MyTE discrepancy notice. For an invalid or unavailable WBS, follow the instructions in the latest MyTE reminder and coordinate with the listed Bench reviewer, approver, or BMT contact. Do not use a Bench WBS temporarily for project dates unless explicitly authorized.

Learning, Deployment, and Conduct

- **Training and upskilling:** Follow and complete the trainings outlined in the Bench Training Roadmap. Attend assigned sessions and update the relevant trackers after completion.
- **Missions and Performance Targets:** Your performance during the bench period will be evaluated based on the quality, timeliness, and completion of assigned missions, as well as demonstrated behaviors and accountability. Performance assessments will distinguish between outcomes within your reasonable control and circumstances dependent on business demand or deployment availability. Failure to meet reasonable and clearly communicated expectations, without sufficient justification, may result in documented performance feedback, additional coaching, an Individual Performance (IP) assessment, or further performance management action, as appropriate.
- **Deployment readiness:** Record all project interviews in the Project/Deployment Interview Form. Keep your profile, primary skill, secondary skills, certifications, and availability current, and respond promptly to project-matching, interview, and assessment requests.

- **Professional conduct and compliance:** Follow Accenture Policies and IIS Bench guidelines. Submit all required forms within the communicated timelines; missed submissions will be treated as non-compliance. Inform your Bench POC as early as possible about absences, leave, schedule changes, access concerns, or other blockers.
- **Discipline process:** Any violation of Accenture policies or applicable IIS Bench guidelines may be reviewed and addressed in accordance with the Discipline Guidelines, company policy, and due process.

Stay Connected

Important announcements, reminders, training schedules, deployment opportunities, and process updates will be shared through the official IIS Bench Teams channels and email. Monitor these channels regularly and acknowledge or act on requests by the stated deadline.

Your First Steps

1. Contact the Bench POC and confirm that you are included in the current or most recently updated Bench list or roster.
2. Confirm your capability and identify your assigned Capability Lead/COE.
3. **Bench Acknowledgement Form:** Complete upon roll-in the IIS Bench Acknowledgement Form and record your completion.
4. **Workday Priorities:** Set up your Bench Priorities in Workday and record your completion here. Please note that these priorities apply only to your current Bench engagement.
5. **Contact Information Form:** Complete this on your first day in Bench. The information will be used only for business continuity planning (BCP), emergencies, and other Bench-related matters, and will be handled in accordance with applicable data privacy laws.
6. **myCompetency:** If you have not yet been assessed, complete your myCompetency assessment and ensure your proficiency information is up to date.
7. Bookmark the attendance, EOD, and tracker links shared by the Bench team.
8. Contact your Bench POC or Capability COE if you have questions or blockers.

Bench assignment does not mean an absence of performance expectations. All employees, whether deployed to client engagements or assigned to the bench, are expected to demonstrate ownership, productivity, continuous learning, and meaningful contributions.

Our Commitment to You

We recognize that career transitions and periods between client assignments can present challenges. Our commitment is to provide meaningful development

opportunities, reasonable expectations, appropriate support, and fair performance assessments.

In return, we expect every employee to take active ownership of their growth, readiness, and contribution.

Your bench period should be a period of progress, not a pause in performance.

Together, we reinvent how we build skills, create value, and prepare for the future.

Once again, welcome to Digital Core - IIS Bench!

Best regards,
Digital Core - IIS Bench Management

Welcome Mailer Review Confirmation: After carefully reviewing this letter, please confirm your completion by submitting the **Welcome Mailer Acknowledgement Form.**
